Abstract The aim of this Design Report is to present the key elements and considerations involved in the development process of the website for a Venture Capital - CoreVenture – Core Investments, showing the people involved, the projects funded and the general thematic areas of investment. Specifically, this report aims to outline the primary design decisions using models, schemas, and use case scenarios. Additionally, it will showcase the conceptual and logical structure of the database.

1 Conceptual Design

This chapter provides a comprehensive overview of the conceptual design of the website. It specifically focuses on elucidating the decision-making process concerning the content, how it is structured into pages, and the navigation flow between them. The subsequent sections delve into the details of these choices, offering a thorough explanation and analysis.

1.1 Content Design

In this section, the C-IDM (Content Interaction Dialogue Model) is introduced as a model that represents the website as a conversation between the user and the application. This model elucidates the nature of the dialogue, including the classification, inter-relationships, and grouping of conversation topics. Furthermore, it offers insights into the content that can be discussed within each category.

1.1.1 C-IDM Diagram

The model focuses on the three main kind of topics: **Areas**, **Projects** and **Persons**. The kind of topic **Areas** consists of all the fields in which the venture capital invests in. For each of them, there are at least 3 projects and at most 6 projects related to that area. Every project concerns at least 1 area, and at most 2 areas. The kind of topic **Projects** contains all the projects in which the company invests in. A project has at most 3 people who work on the project overall. A **Person** is a kind of topic. A person is employed in the company, and works on at least 1 and at most 3 projects. A person can also supervise no projects, or 3 at most. Finally, the schema contains other two single topics: **Contacts** and **About Us**. While the former deals with how to contact the company, the latter contains a general description of *Core Venture*.

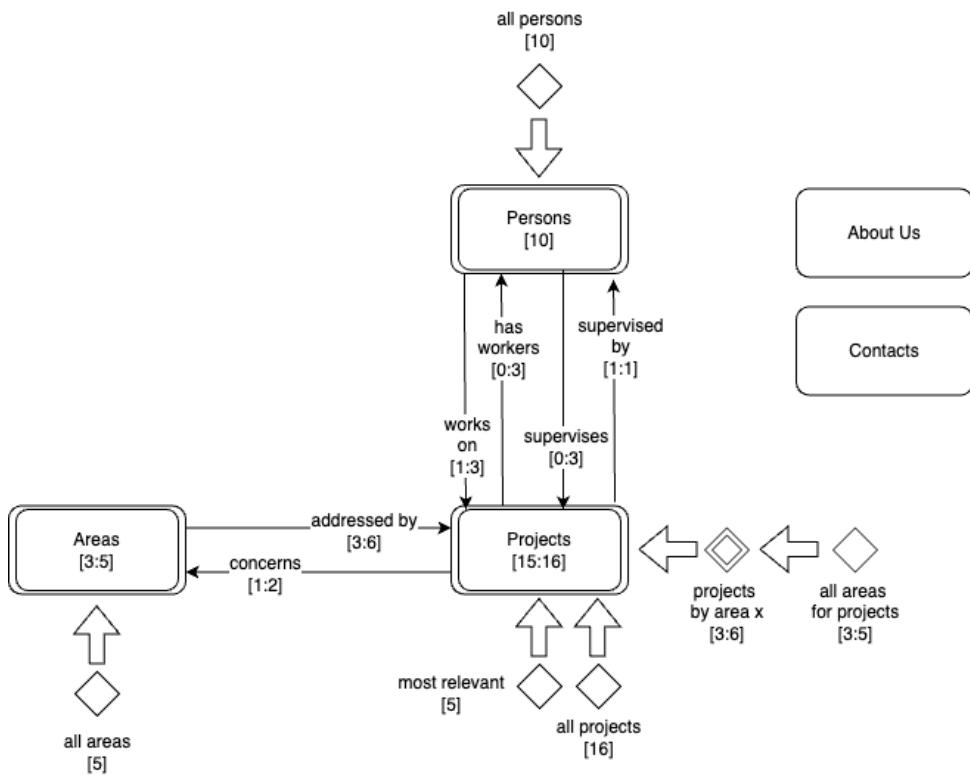

Figure 1: C-IDM Diagram

1.1.2 Content Tables

In the following tables are defined the contents of the conversation between the human and the application for each category of subject.

Type of Topic: Persons
Employee name: text
Employee role: text
Employee photo: image
Employee bio: text (max 200 words)
Employee mail: email
List of supervised Projects [Project name, Project picture, Year of investment]
List of Projects they have worked on [Project name, Project picture, Year of investment]

Group: All Persons
Group title: "Meet our team of experts, we are here to make your company grow."
Description: "To be the company our customers want us to be, it takes an electric group of passionate operators. Get to know the people leading the way at Core Investments."
Person preview: List of [Thumbnail image, Person name, Person role]

Type of Topic: Areas

Group: All Areas for Projects

Area preview: List of [Area name]

Group: Projects by Area

Projects preview: List of [Project logo, Project name, Year invested, Most Relevant icon]

2 Visual Design

This chapter will contain the complete definition of the graphical structure of the implemented website. Each page will be represented via a **high-fidelity wireframe**, which will contain and clearly highlight all the content, interaction and navigation elements offered on screen. From this section, it will be possible to have a clear glance at the final interface through the prototypes.

2.1 Home Page

The home page of the site serves as a summary of all of the content offered across all other pages. As this is the first approach a user will have with the organization's website, and therefore with the organization itself to an extent, we chose to provide immediate ways to reach every part of the site in a guided manner. The Home Page contains many transition links to aid the user in thoroughly exploring everything the venture capital firm has to offer, as is highlighted in the prototype below.

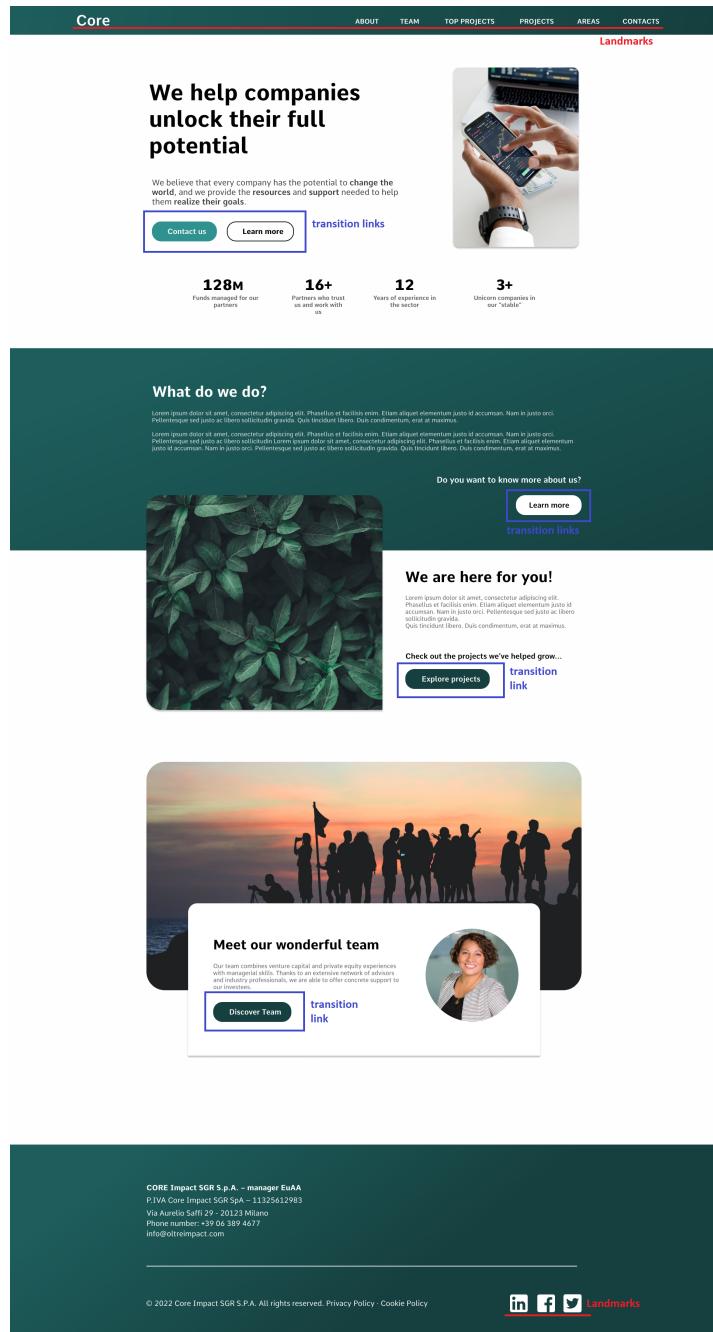

Figure 2: Home Page wireframe

2.2 Single Topic Pages

The following section will describe all pages containing information about a single topic.

2.2.1 Contacts Page

The goal of this page is to encourage users who may be interested in the services offered by the venture capital firm to get in touch with the organization. All information on how to achieve that is provided: phone number, email and social network links are available, as well as a guided and well-highlighted form to fill.

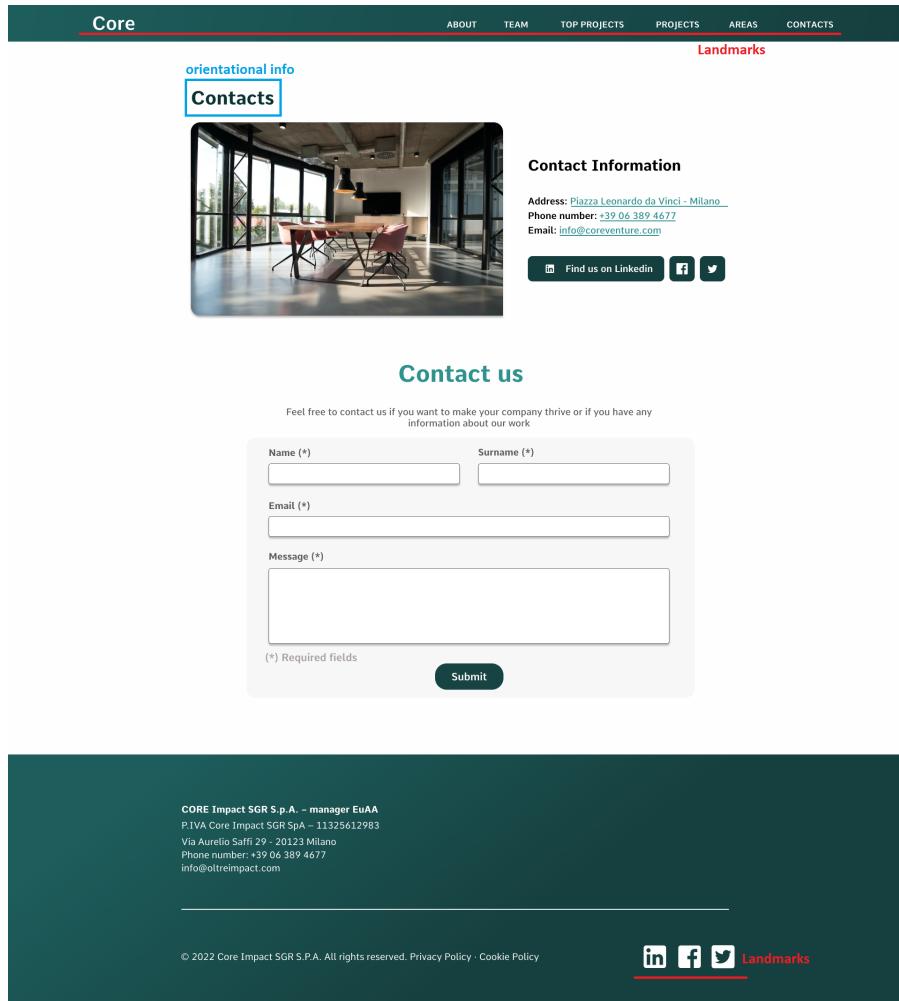

Figure 3: Contacts Page wireframe

2.2.2 About Us Page

The goal of the about page is to illustrate the Venture Capital's strategy, providing insight to future investors and customers about the possibilities and advantages of a collaboration. As the final goal for the organization is to find more projects and people interested in investing in those, the About page leads directly to the Contacts page through a transitional link.

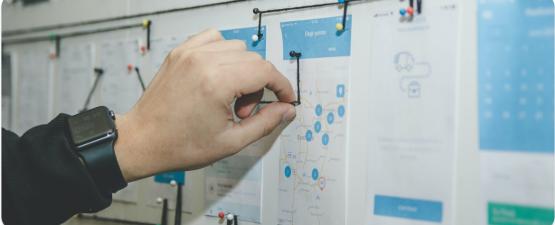

Core

ABOUT TEAM TOP PROJECTS PROJECTS AREAS CONTACTS **Landmarks**

About us **OrientalInfo**

European roots. Global from the start.

We use our hard-won experience to help visionary founders become global category leaders.

WHAT IS OUR APPROACH

We're not a traditional venture capital firm. We are built by founders for founders. Every single aspect of Core, every part of our culture, and every decision we take, is designed with the ambition of helping founders succeed. We exist for more than returns. We believe entrepreneurs are the ultimate agents of positive, transformational change across every aspect of our society and economy. Our mission is to spur that progress and support founders in their quest to build the world they want to live in. That's why we partner with the world's most ambitious founders. The rule-breakers who want to build the next leader in their category. The world-shapers creating the technologies that will change the way we live and work. The game-changers using technology to rewrite the world in favour of something better, for as many people as possible. When we find these people, we invest much more than money. We work hand-in-glove with them, drawing on hard-won experience scaling some of the most successful technology companies in the world.

Why should you partner with us?

- Aligned to Win**
Choose us for unmatched expertise and exceptional returns on your investment.
- Performance through Integrity**
Our success is rooted in unwavering integrity and consistently delivering.
- Bold and Progressive**
Embrace our bold and progressive approach to drive innovation and maximize growth potential.
- Humble**
Partner with a humble team that values collaboration and puts your success above all else.

What should founders expect?

The truth is no two founders, products or business models are the same, and so there is no 'one size-fits-all' approach to investing. However, as a founder, these are some general things you should expect if we are lucky enough to be invited into your fundraising process.

We listen, more than we talk.
Don't worry, that's because we focus on the things that matter and we do our work upfront. But we will have questions.

It's never too early to speak to us.
If you are interested in knowing us better feel free to contact us.

Landmarks

Figure 4: About Page wireframe

2.3 Introductory Pages

This section will illustrate all of the pages where a user will understand what a *group* is about and what its *members* consist of.

2.3.1 Areas Page

This page will briefly illustrate all of the possible areas in which the Venture Capital has invested. Upon finding this page, the user is provided with a brief description of each area, and is able to directly navigate to a more in-depth explanation of the area of interest (to the specific Area Page), or to directly jump to the projects that belong to that area.

The wireframe shows the 'Areas of Investments' section of the 'Core' website. It features five cards, each representing an investment area:

- Artificial Intelligence:** Describes AI's impact on various industries. Includes a brain network icon and two buttons: 'Discover more' (green) and 'Discover projects' (blue).
- Streaming Services:** Describes the growth of streaming platforms. Includes a stack of media devices icon and two buttons: 'Discover more' (green) and 'Discover projects' (blue).
- Health Technology:** Describes the use of technology in healthcare. Includes a doctor icon and two buttons: 'Discover more' (green) and 'Discover projects' (blue).
- Fintech:** Describes the transformation of the financial industry. Includes a digital interface icon and two buttons: 'Discover more' (green) and 'Discover projects' (blue).
- Green Tech:** Describes technologies for environmental sustainability. Includes a green plant icon and two buttons: 'Discover more' (green) and 'Discover projects' (blue).

Below the cards, there is a footer with company information, social media links, and a 'Landmarks' button.

Figure 5: Areas Page wireframe

2.3.2 Projects Page

Here, users will be able to visualize all of the projects made available. Along with the logo of each project, the projects deemed as "most relevant" will display an icon which makes their importance immediately obvious. It is also possible to filter through the projects that are displayed based on the area they belong to and their relevance, and this is made very easy with simple choice chips at the top of the page.

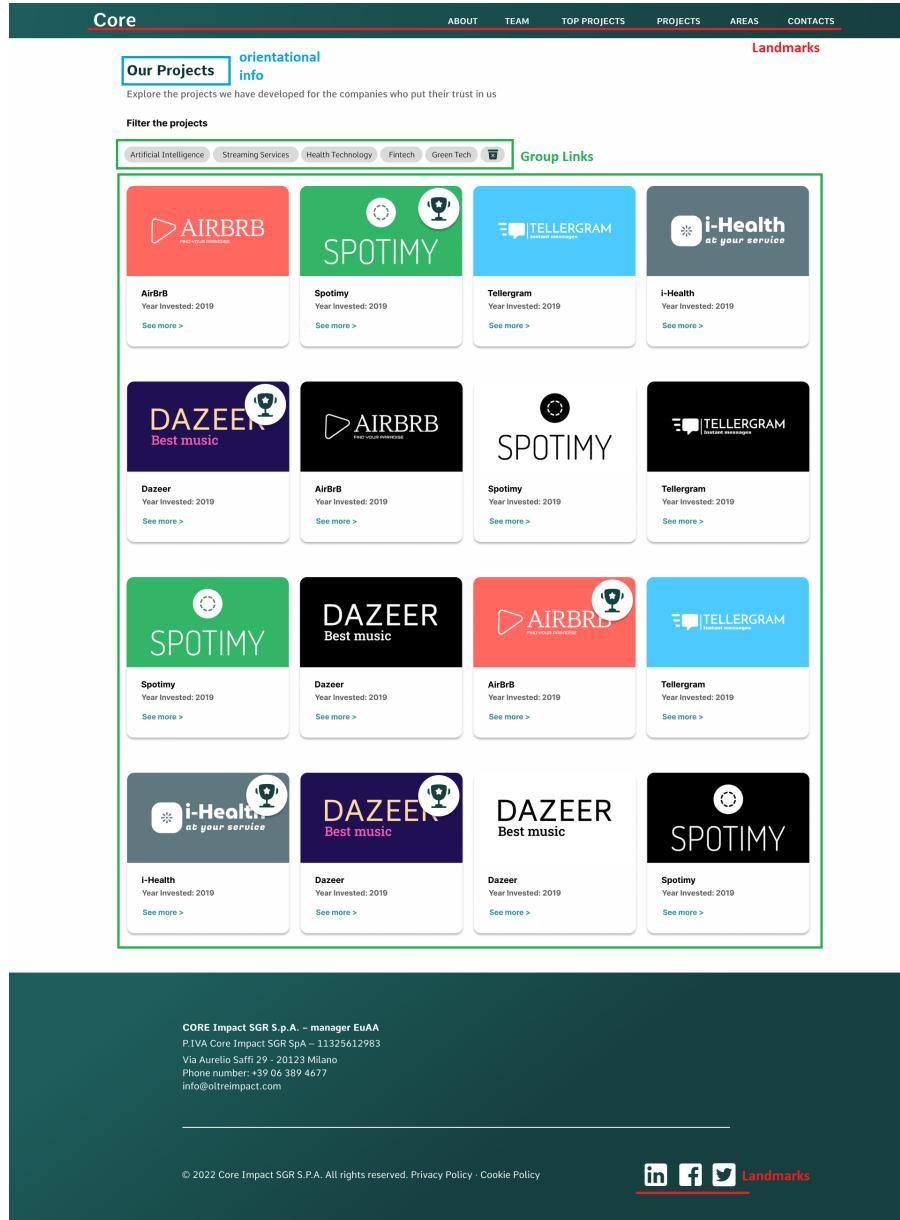

Figure 6: Projects Page wireframe

2.3.3 Top Projects Page

This page is important as it highlights the venture capital's most successful stories. Users are able to easily access this page from the navbar, or from one of the Multiple Topic pages containing a single most relevant project. Clearly, this page leads the user to seek more information about the most relevant projects that are presented, which are displayed in an interactive slideshow. This aims to engage the user, encouraging them to

find out further.

The wireframe illustrates the layout of the Top Projects page. At the top, a dark green header bar contains the word "Core" in white, followed by a horizontal menu with links: ABOUT, TEAM, TOP PROJECTS, PROJECTS, AREAS, and CONTACTS. To the right of the menu, the word "Landmarks" is displayed in red. Below the header, a section titled "Top projects" features a heading "Our most successful stories". A descriptive text follows, stating: "Fintech companies are disrupting traditional financial models and empowering individuals and small businesses with new tools and services. Innovative solutions such as blockchain, mobile payments, and robo-advisors are creating vast opportunities for growth and challenging established players in the industry." Below this text is a photograph of several people working on laptops at a table. Three cards below the photograph provide key values: "Impactful Stories" (Core Ventures-backed startups are driving transformative impact across diverse tech sectors), "Success Oriented" (Core Ventures is driven by a relentless pursuit of success in every investment), and "Trust: a Priority" (Trust is Core Ventures' top priority, fostering strong relationships with entrepreneurs and investors). A large section below these cards displays five cards representing Core Ventures-backed startups: Spotify (Year Invested: 2019), Tellergram (Year Invested: 2019), i-Health (Year Invested: 2019), and Dazer (Year Invested: 2019). Each card includes a "See more >" link. At the bottom of the page, a dark footer bar contains the text "CORE Impact SGR S.p.A. - manager EuAA", the company's IVA number, address, phone number, and email. It also includes copyright information: "© 2022 Core Impact SGR S.P.A. All rights reserved. Privacy Policy · Cookie Policy". On the right side of the footer, there are social media icons for LinkedIn, Facebook, and Twitter, followed by the word "Landmarks" in red.

Figure 7: Top Projects Page wireframe

2.3.4 Team Page

This page offers an overview of the whole team working at CoreVenture, providing the user with very easy access to information about any one of the members of the team. The group links will lead to a Multiple Topic page for the specific person, which is made very intuitive with the use of clickable cards.

Figure 8: Team Page wireframe

2.4 Multiple Topic Pages

This section presents *multiple topic pages*, the pages where users will find information and content about a topic of a specific kind.

2.4.1 Person Page

This page is specific to one of the members of the team working at CoreVenture. All information relevant to the user is contained in this page, including a complete description of the person's background, their name and role within the organization, their e-mail and LinkedIn contact link. It is also possible to find the Projects each team member has supervised and worked on, displayed as *transitional links* in the intuitive form of cards, the same as the ones used in the Projects introductory page.

The wireframe illustrates the structure of the Person Page:

- Header:** A dark green header bar with the word "Core" in white. Below it is a red horizontal bar containing navigation links: ABOUT, TEAM, TOP PROJECTS, PROJECTS, AREAS, and CONTACTS. To the right of this bar is a red link labeled "Landmarks".
- Section Headers:** Two blue rectangular boxes labeled "The Team" and "Orientational Info" are positioned above the main content area.
- Profile Section:** Features a large portrait of Mario Bianchi, an Investment Manager. Below the portrait, his name "Mario Bianchi" and title "INVESTMENT MANAGER" are displayed. A "WHO AM I?" section follows, containing placeholder text (Lorem ipsum dolor sit amet, consectetur adipiscing elit...) and a "Find me on LinkedIn" button.
- Projects Supervised by Me:** A section titled "Projects supervised by me:" featuring two cards: "AIRBRB" (red card) and "SPOTIMY" (green card). Each card includes the company logo, name, and a "See more >" link.
- Transitional Links:** A blue-bordered section titled "Transitional Links" containing three cards: "DAZEER" (dark purple card), "TELLERGRAM" (light blue card), and "i-Health" (dark grey card). Each card includes the company logo, name, and a "See more >" link.
- Footer:** A dark teal footer bar containing the company's legal information: "CORE Impact SGR S.p.A. – manager EuAA", address "P.IVA Core Impact SGR SpA – 11325612983", phone number "+39 06 389 4677", email "info@oltreimpact.com", and social media links for LinkedIn, Facebook, and Twitter. It also includes a "Landmarks" link.

Figure 9: Person Page wireframe

2.4.2 Project Page

This page focuses on one specific project among the many that CoreVenture has chosen to invest in. Once again, all relevant information can be found in this page. We chose to give a textual description of each project, explaining its general aim and concerns. Along with that, we included a review by the company explaining the role that CoreVenture has had in the growth of the project. The employee that supervised the project, as well as the other team members that worked on it (if any) are displayed in the page. We also find the areas the project belongs to, and whether it is most relevant - all of these are transitional links which will lead either to the person page, or to the specific area's page / most relevant projects page. It is also possible to navigate through the various projects in alphabetical order, using the group link at the bottom of the page in the form of two arrows which clearly indicate next and previous.

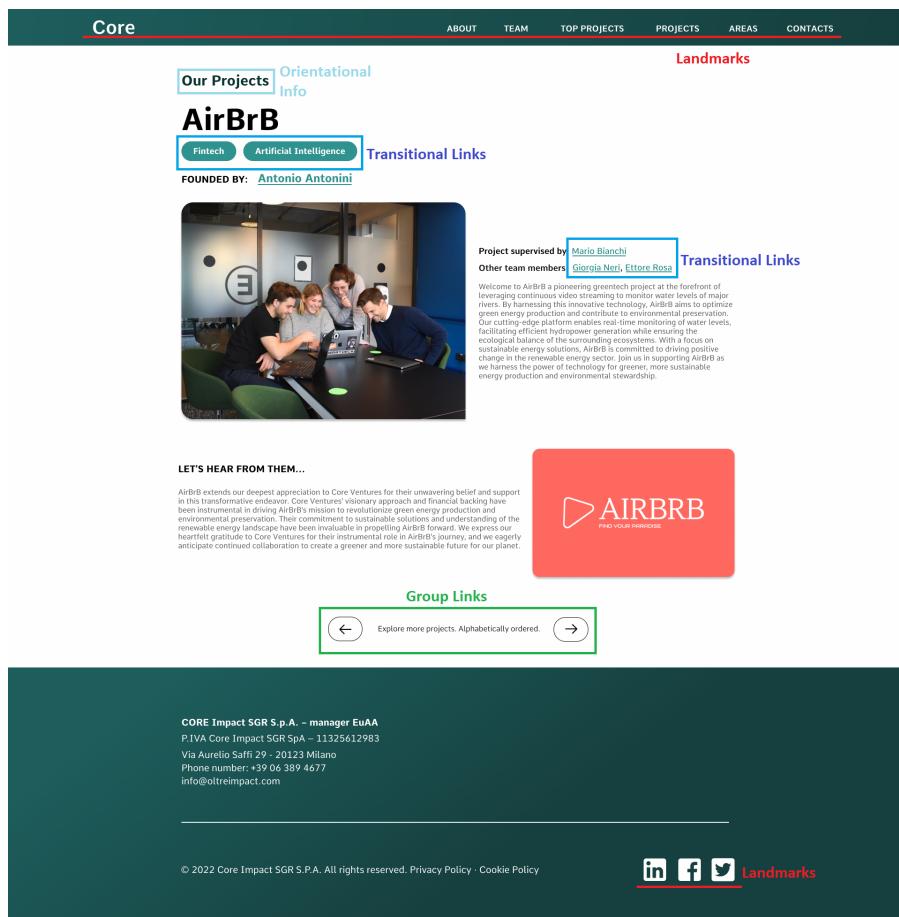

Figure 10: Project Page wireframe

2.4.3 Area Page

This page will introduce the areas of investment that CoreVenture is pursuing. A brief description of each area is provided at the top of the page, as well as motivation and interest behind the specific sector. We decided to use informative non-clickable cards (which are also present in the Contacts page) to once again highlight key information. As the goal is to get an interested user to explore the related projects, the page provides a transitional link which will lead to the Projects page with the filter active on the desired area. It is also possible to explore the other areas from the multiple topic page, by using the group links in the form of arrows at the bottom of the page.

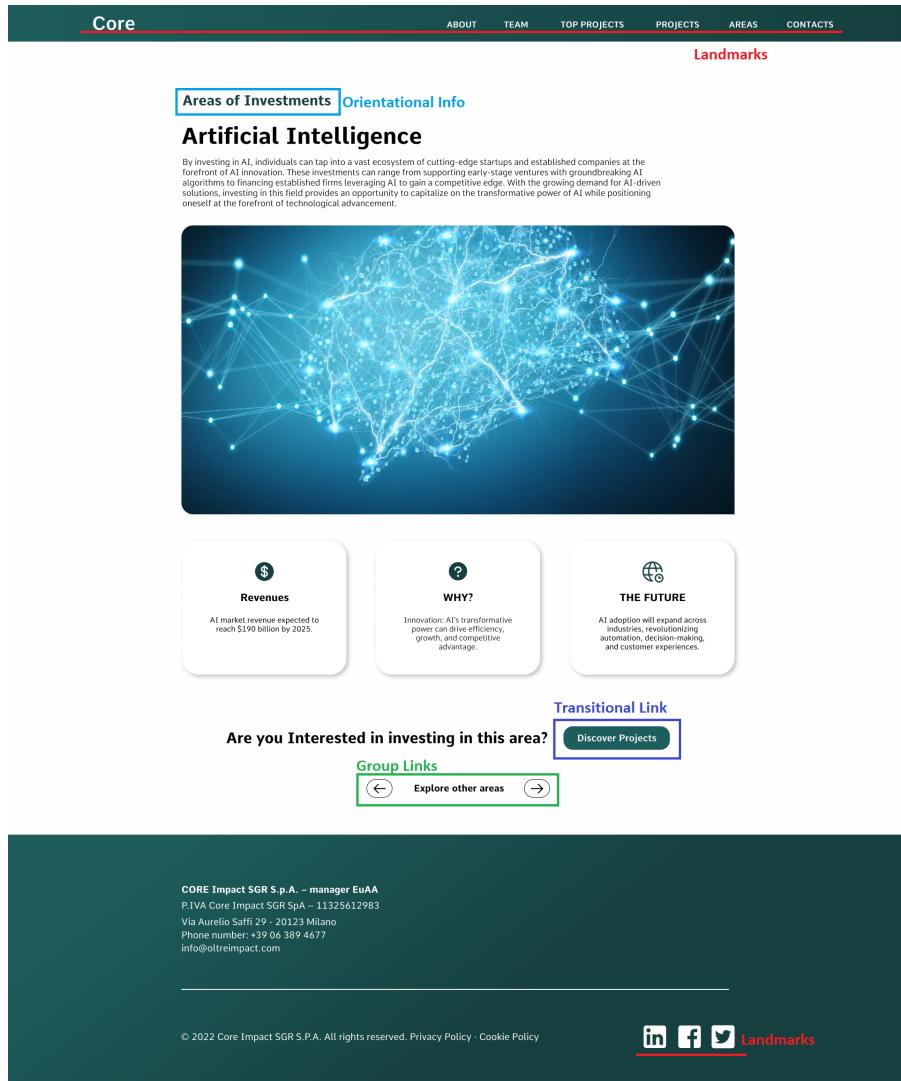

Figure 11: Area Page wireframe

3 Interaction Scenarios

This section brings direct examples of how the users will interact with the system, and the action flow required to access content and functions of the site. Interaction scenarios describe actual possible uses of the site, and each use case scenario will be presented with a textual narrative and visual images where interactive elements that need to be activated are highlighted.

3.1 Use Case 1

3.1.1 Textual Narrative

Name	What investment areas have to offer
Profile	A user, who is very concerned with environmental impact, is interested in investing in green oriented companies.
Goal	They would like to know what it means to invest in Green Tech at CoreVenture and explore all the available projects.
Context	They visit the website from their personal laptop.
Tasks	<ol style="list-style-type: none"> 1. The user accesses the <i>home page</i> of CoreVentures' site. 2. Being interested specifically in Green Tech, the user goes to the <i>Areas</i> page through the navigation bar. Here, it is possible to get a brief overview of all sectors the company operates in. The user finds the Green Tech area card. 3. The user then clicks on "<i>Discover More</i>" button, where they are directed to the <i>Green Tech</i> area page. Here they are presented with a detailed overview of the area. 4. The user clicks on "<i>Discover Projects</i>" and is redirected to the Projects page, which only displays Green Tech related projects as the filter is active.

Table 1: Textual Narrative of Use Case Scenario 1

3.1.2 Interaction Flow

The interaction flow starts on the homepage, which features a main slogan "We help companies unlock their full potential" and two buttons: "Contact us" and "Our strategy". A red arrow points from the "Areas" button in the top navigation bar to the "Areas of Investment" section. This section lists five categories: Artificial Intelligence, Streaming Services, Health Technology, Fintech, and Green Tech. A red arrow points from the "Green Tech" category to the "Our Projects - Green Tech" page.

The "Our Projects - Green Tech" page displays three projects: ENERGYHUB, GridX, and Sendle. Each project card includes a thumbnail, the company name, the year invested, and a "See more" link. A red arrow points from the "Discover more" button in the Green Tech project card to the "Discover Project" button on the right side of the page, which is highlighted with a red box.

Figure 12: Use Case Scenario 1 - interaction flow

3.2 Use Case 2

3.2.1 Textual Narrative

Name	Who to collaborate with within the team
Profile	The owner of a recently founded startup which focuses on Fintech would like their project to grow.
Goal	They are looking for a Venture Capital and want to find out whether CoreVenture has any employees that are a good match.
Context	The startup's owner visits Core Venture's site on their laptop and shows it to the whole startup team during a meeting.
Tasks	<ol style="list-style-type: none"> 1. The user accesses the <i>home page</i> of CoreVenture' site. 2. Wanting to narrow down their field, they access the <i>Top Projects</i> page through the navigation bar. Here, they are able to find whether CoreVenture' successful investments are other companies that work in the same area. 3. As they explore the page, they notice Klarna among the listed top projects. As they know the company, and the business area is the same, they click on its <i>Project card</i>. 4. As they are now on Klarna's individual <i>Project page</i>, they can access all information they need. They want to know whether the Venture's team is a good fit, so they click on the link of Klarna's project <i>Supervisor</i>. 5. As they are now on the supervisor's individual <i>Person page</i>, which provides the employee's background and expertise, they can decide whether to contact the Venture Capital in the near future.

Table 2: Textual Narrative of Use Case Scenario 2

3.2.2 Interaction Flow

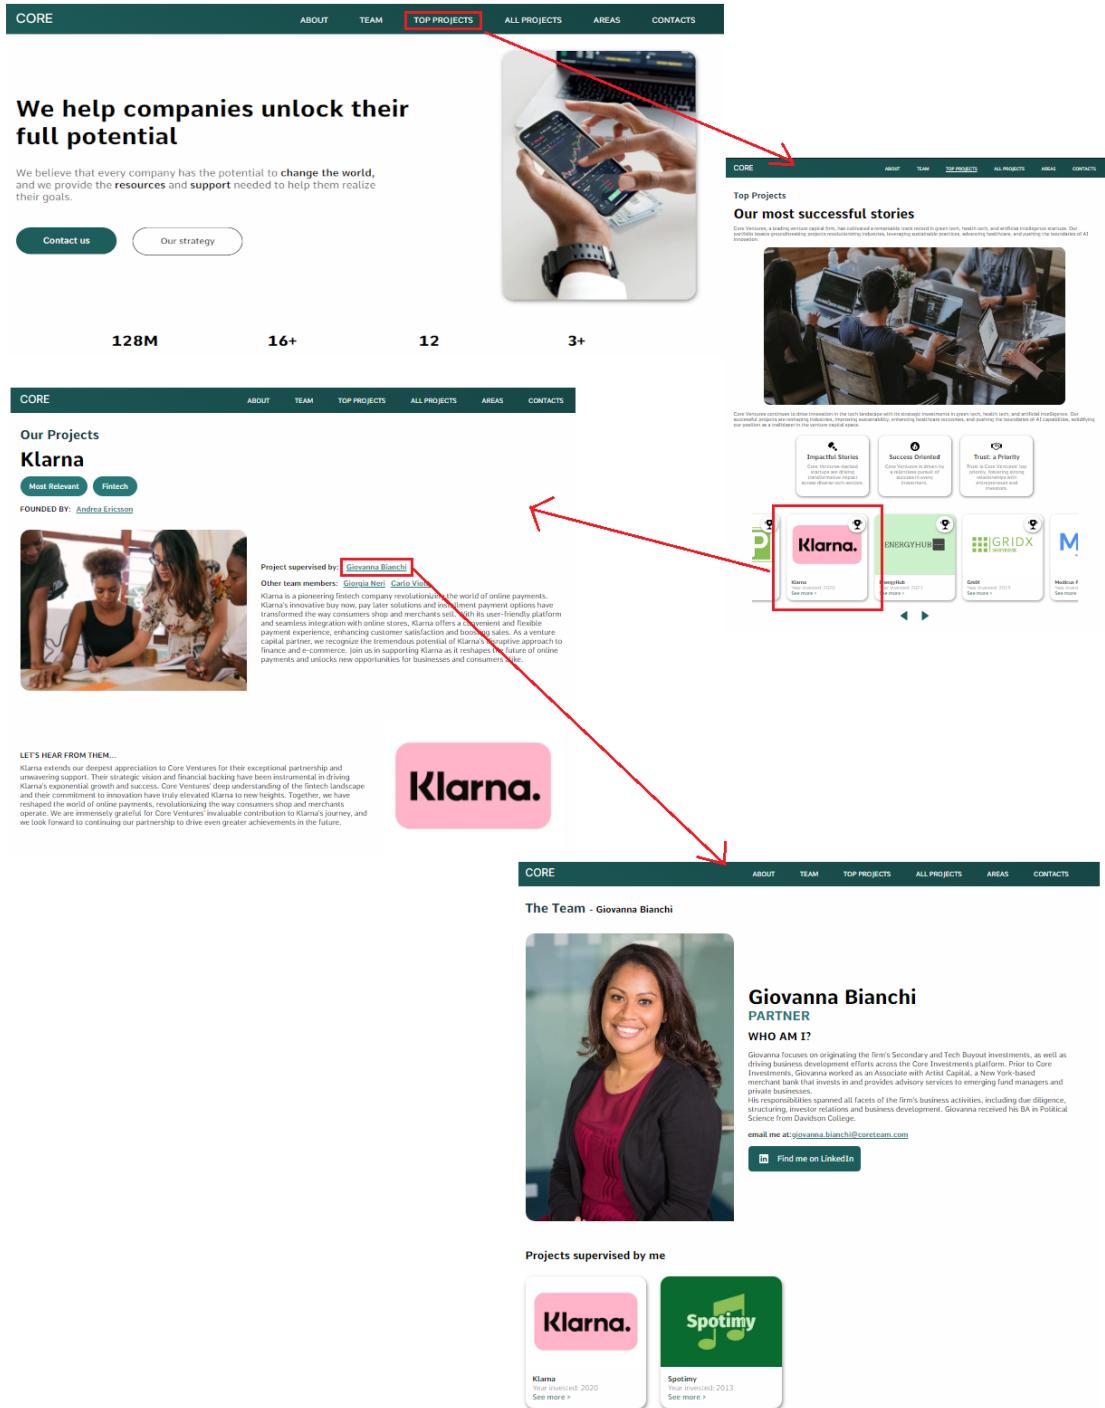

Figure 13: Use Case Scenario 2 - interaction flow

3.3 Use Case 3

3.3.1 Textual Narrative

Name	Getting in touch with CoreVenture.
Profile	A potential big investor who mainly focuses on AI related startups is looking for suitable projects.
Goal	They know CoreVenture has a section of their investments dedicated to AI, but want to find out how they operate to have guarantees about the revenues and strategies.
Context	The investor visits CoreVenture's website from their smartphone.
Tasks	<ol style="list-style-type: none"> 1. The user accesses the <i>home page</i> of CoreVenture' site, and carefully read what it has to offer. 2. They can immediately spot the <i>Our Strategy</i> button on the home page, and as they want to know more about the firm, they click on it. 3. They can now access the <i>About</i> page, and have a complete and immediate overview of the way CoreVenture operates and what their values are as a Venture capital. 4. Upon reading the whole page, they decide they want to know more. The <i>About</i> page provides a button which links to the <i>Contacts</i> page. The investor immediately clicks on it. 5. Being on the <i>Contacts</i> page, it is now really easy for the user to communicate with the venture. They fill out the form, guided by the rules which are clearly displayed upon filling the form's fields. Once they are satisfied with the message, they click on <i>Submit</i> and are met with a sending confirmation.

Table 3: Textual Narrative of Use Case Scenario 3

3.3.2 Interaction Flow

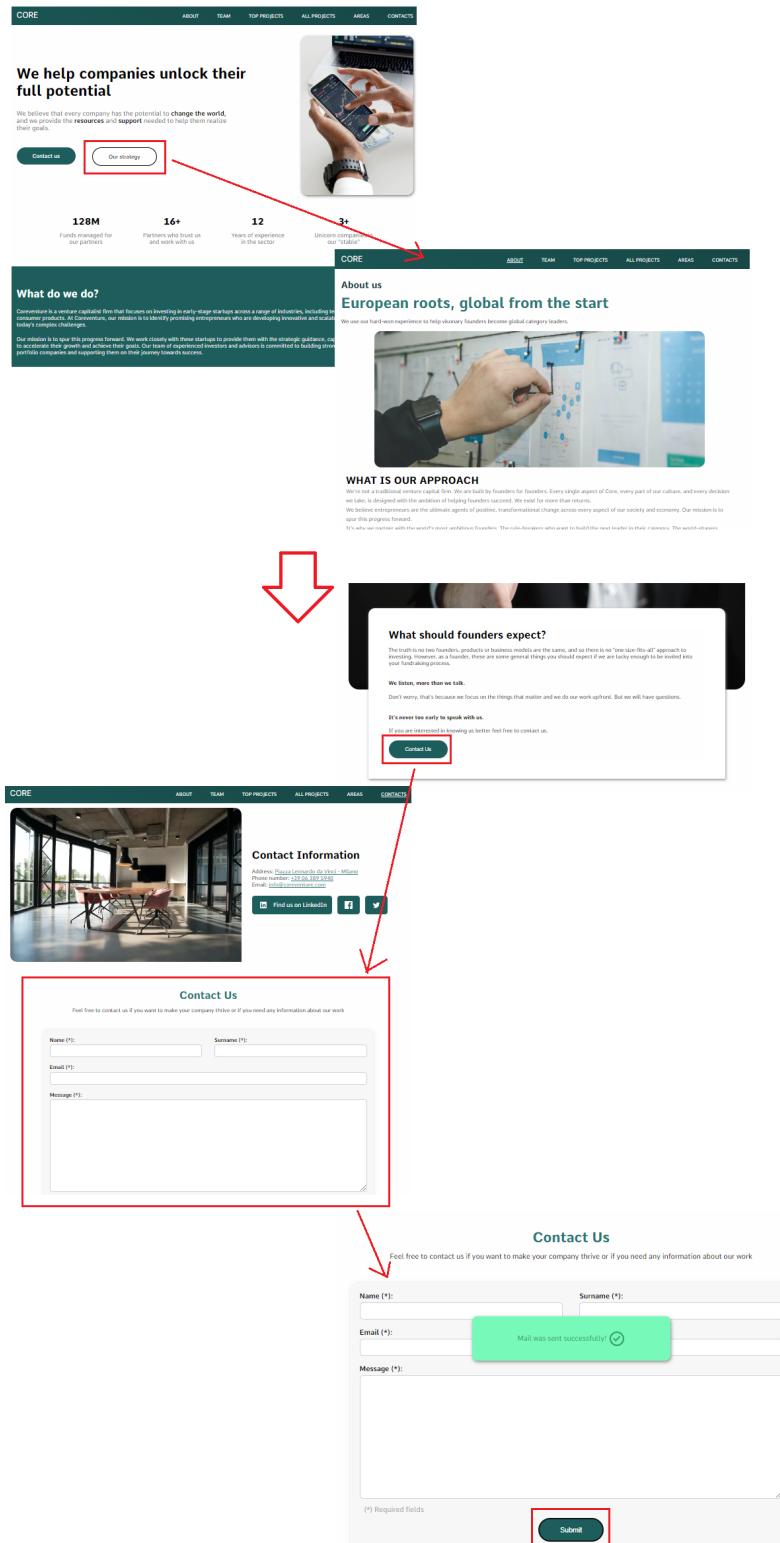

Figure 14: Use Case Scenario 3 - interaction flow

4 Database Design

This chapter presents the database design for the website to be implemented. The design is represented through an Entity-Relationship diagram. Additionally, a tabular representation of the logical model will be provided.

4.1 Entity-Relationship Diagram

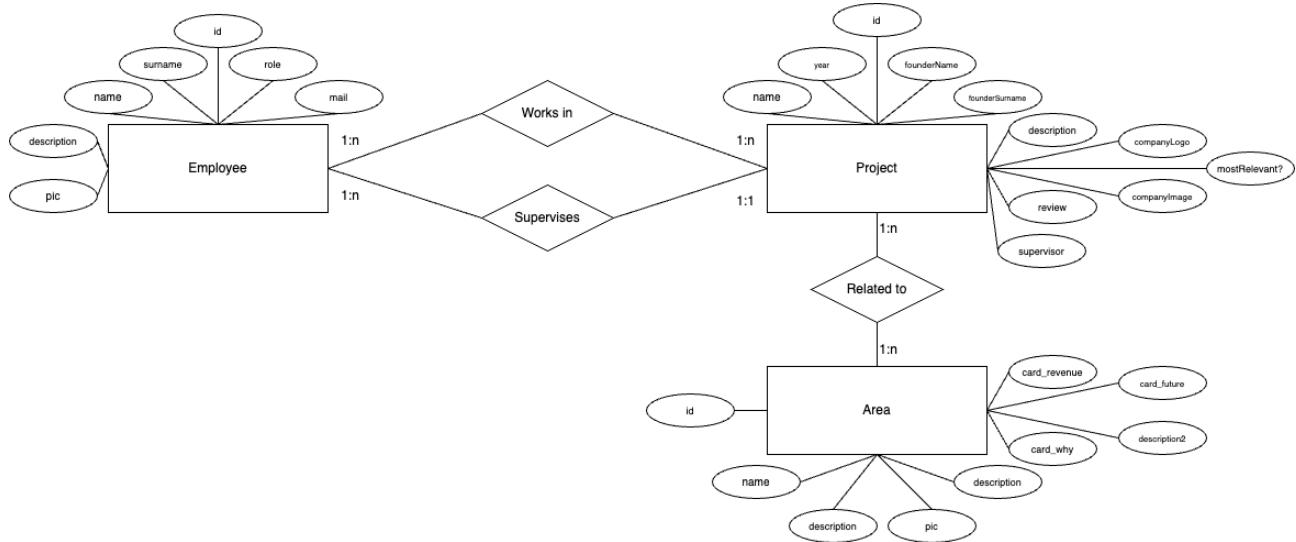

Figure 15: ER Diagram

4.2 Relational Tables

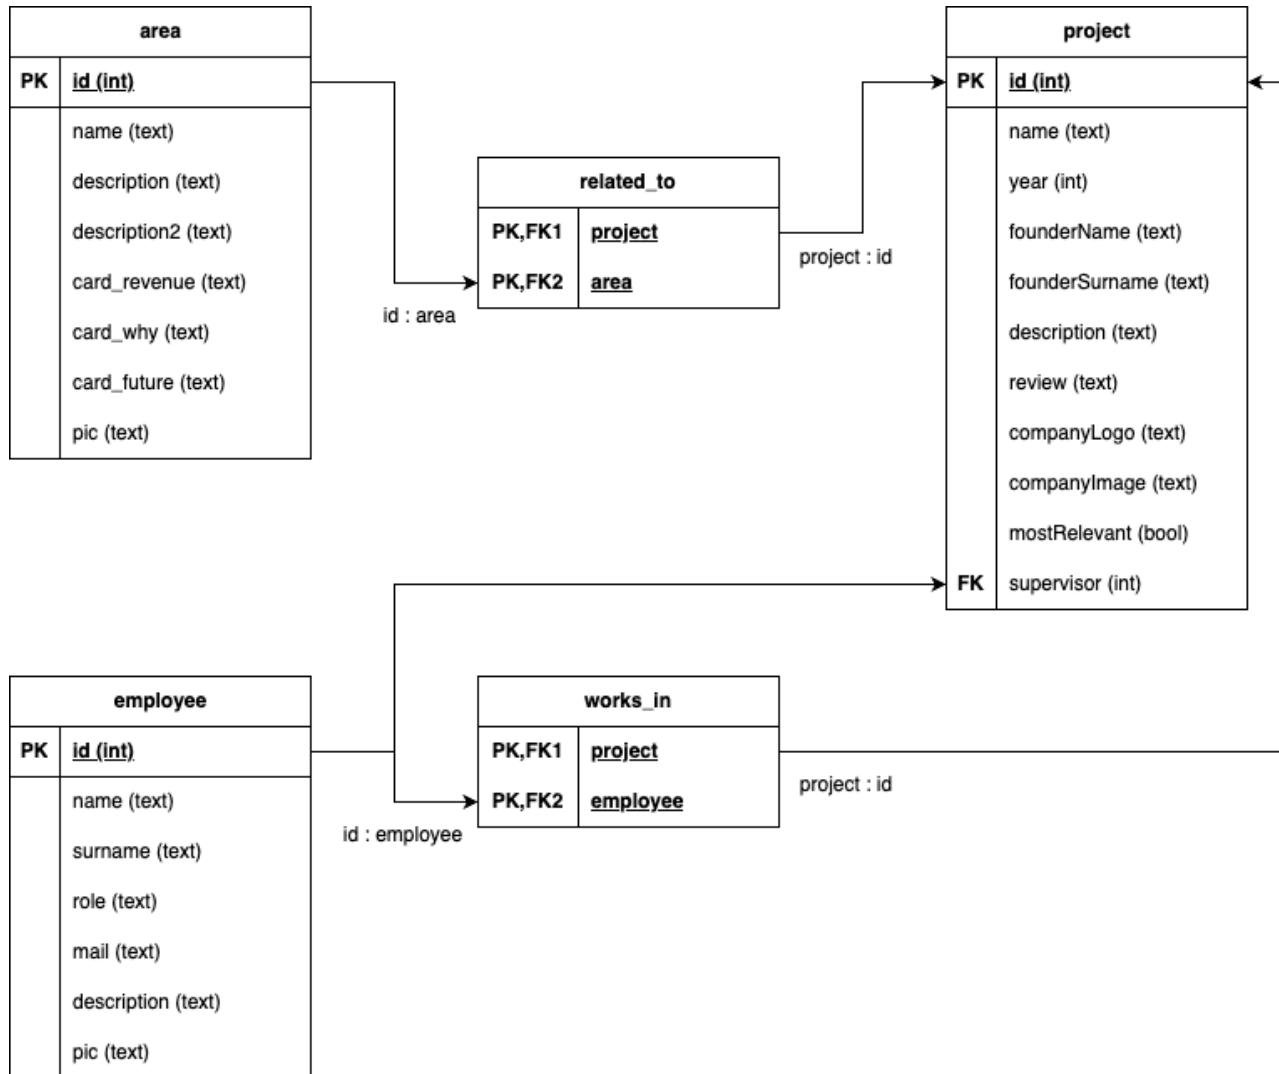

Figure 16: Relational Tables

5 Annex

5.1 Division of Labour

Every person has contributed to the overall design and development of all aspects of the website. For the pages, we have divided the workload as follows:

- **Scherini Samuele:** Homepage, Contacts, Team.
- **Sironi Alessandro:** About, Contacts, Areas.
- **Tognini Elisa:** Projects, Top Projects.

We developed the project by defining common guidelines for development. Each member of the group was able to touch on all aspects relating to the website development, from the design and implementation of the components to the backend. In particular:

- **Scherini Samuele:** Focus on component development and CSS styling.
- **Sironi Alessandro:** Focus on page implementation and database queries.
- **Tognini Elisa:** Focus on pages and components implementation.
